CONTENTS VOLUME 84

Vol. 84 No. 1 2002

HARRY DANKOWICZ / Slow Diffusion and Effective Stability of Dust Particles Orbiting Asteroids 1–25

G. A. KRASINSKY / Dynamical History of the Earth–Moon System 27–55

KONSTANTIN V. KHOLSHEVNIKOV and ANDREI V. ELKIN / Convergence of Liapunov series for Maclaurin ellipsoids 57–63

T. G. VOZMISCHEVA / The Lagrange and Two-center Problems in the Lobachevsky Space 65–85

GREGORY BEYLKIN and ROBERT CRAMER / Toward Multi-resolution Estimation and Efficient Representation of Gravitational Fields 87–104

Vol. 84 No. 2 2002

M. A. ANDREU / Dynamics in the Center Manifold Around L_2 in the Quasi-Bicircular Problem 105–133

K. G. HADJIFOTINOU and JOHN D. HADJIDEMETRIOU / A Symplectic Mapping Model for the Study of 2:3 Resonant Trans-Neptunian Motion 135–157

JACQUES FÉJOZ / Global Secular Dynamics in the Planar Three-Body Problem 159–195

SYLVIE JANCART, ANNE LEMAITRE and ANNE ISTACE / Second Fundamental Model of Resonance with Asymmetric Equilibria 197–221

Vol. 84 No. 3 2002

CRISTINA STOICA / Classical Scattering and Block Regularization for the Homogeneous Central Field Problem 223–229

E. A. PERDIOS, V. S. KALANTONIS and M. N. VRAHATIS / Efficient Method for Computing with Certainty Periodic Orbits on a Surface of Section 231–244

MAYER HUMI and THOMAS CARTER / Models of Motion in a Central Force Field with Quadratic Drag 245–262

CECILIA CLEMENTI and MARCO PETTINI / A Geometric Interpretation of Integrable Motions 263–281

F. MALIGE, P. ROBUTEL and J. LASKAR / Partial Reduction in the N-body Planetary Problem Using the Angular Momentum Integral 283–316

Erratum 317

Vol. 84 No. 4 2002

SŁAWOMIR BREITER and GILLES MÉTRIS / Ptolemaic Transformation in Keplerian Problem 319–330

VACHESLAV EMEL'YANENKO / An Explicit Symplectic Integrator for Cometary Orbits 331–341

SEPPO MIKKOLA and SVERRE AARSETH / A Time-Transformed Leapfrog Scheme: Integration of Few-Body Systems with Large Mass Ratios 343–354

ZSOLT SÁNDOR, BÁLINT ÉRDI and CARL D. MURRAY / Symplectic Mappings of Co-orbital Motion in the Restricted Problem of Three Bodies 355–368

CÉDRIC LANGBORT / Bifurcation of Relative Equilibria in the Main Problem of Artificial Satellite Theory for a Prolate Body 369–385

ESTHER BARRABÉS and GERARD GÓMEZ / Spatial *p-q* Resonant Orbits of the RTBP 387–407

JI-LIN ZHOU, YI-SUI SUN and LI-YONG ZHOU / Evidence for Lévy Random Walks in the Evolution of Comets from the Oort Cloud 409–427

Corrigendum 429

Instructions for Authors 431–436

Volume Contents 437–438
